MANOJ KUMAR K

Frontend Developer with MERN Stack Exposure

Mail: Mkjerry.dev@gmail.com **Phone:** +919080073730 **Address:** Vellore, Tamil Nadu

Linkedin: Link **GitHub:** Link **Portfolio Website:** Link

SUMMARY

Frontend Developer with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js). Recent BCA graduate, currently pursuing a Post Graduate Diploma in Computer Applications (PGDCA). Skilled in building responsive web interfaces, integrating REST APIs, and developing backend modules with Node.js and Express. Familiar with MongoDB and MySQL for database management. Also have well knowledge in AI tools like ChatGPT, Claude, GitHub Copilot, and Cursor for faster development and debugging the web applications.

WORK EXPERIENCE

- **Freelance Web Developer:** *Self-Employed | Remote* **[2026 - Current]**
  Built premium, responsive websites for business clients, managing the full process from initial requirements through final deployment. Delivered mobile-friendly designs tailored to each client's brand and business goals, while independently handling client communication and revisions to complete projects on schedule.
- **Web Development Intern:** *SystemTron | Remote* **[Jan 2025 - Feb 2025]**
  Completed hands-on training and project work in web development fundamentals,Assisted in building and testing web components as part of guided development tasks under mentorship.

SKILLS

- **Languages:** C, C++, Python, JS, Go Lang.
- **Frontend:** React.js, Tailwind CSS, Bootstrap.
- **Backend:** Node.js, Express.js, RESTful APIs.
- **Database:** MongoDB, MySQL, PostgreSQL.
- **AI & Automations:** ChatGPT, Claude, GitHub Copilot, Cursor.

PROJECTS

- **EduVision: Link**
  EduVision is a mini-ERP for government primary schools, managing attendance, marks, and student data. Built with the MEEN stack, it enables easy supervision and centralized monitoring.
- **Virtual Hand Painter: Link**
  Virtual HandPainter is afeature used in online meetings to represent visuals without the need for any hardware assistance. It uses our camera to track hands for drawing which reduces the reliance on text and promotes visual interaction by enabling on-screen drawing.
- **Simple Q/A Chatbot: Link**
  This Project isdesigned to answer a predefined set of questions. It works on a conversational model, interpreting short user inputs effectively. The bot provides accurate responses based on the detected query. Mostly used in Customer Support and Tech Assistance fields.
